

Using Sentiment-Analysis: Sentiment Analysis Tool

Sentiment-Analysis is a user-friendly tool that enables you to analyze the sentiment or tone of text inputs. Follow these steps to use the tool effectively:

- 1. Enter Text:** Open the Sentiment-Analysis app in your browser. You'll see a text area provided on the interface.
- 2. Input Text:** Enter the text you want to analyze in the text area. This could be anything from social media posts to customer reviews.
- 3. Analyze:** Once you've entered the text, click the "Analyze" button.
- 4. View Result:** The sentiment analysis result will be displayed on the app. The result will indicate whether the input text has a positive, negative, or neutral sentiment.
- 5. Interpretation:** Based on the sentiment result, you can gain insights into how the text is perceived emotionally.

Sentiment-Analysis makes sentiment analysis easy and accessible, allowing you to quickly understand the sentiment behind textual content.

Feel free to explore and customize the app according to your preferences. Happy sentiment analyzing!
